What is Astrology?

Astrology is the study of planetary forces and cosmic cycles. It is a language of energy that describes the quality of time.

It is NOT fortune-telling. Astrology reveals tendencies, potentials, and timing, but it does not dictate your fate.

You always have free will. The planets may indicate the 'weather', but you decide how to dress for it and how to navigate the terrain.

“Wise man rules his stars, the fool is ruled by them.”

Transits represent the current movements of the planets in the sky and how they interact with your unique birth chart. They act as triggers for specific events, psychological shifts, and opportunities for growth.

Your Natal Chart
